CONSTRUCTION

GENERAL

GENERAL

CONSTRUCTION

Demolition:

We also specialize in the demolition and removal of all buildings such as: Government buildings, companies, residential and commercial complexes, palaces, villas, rest houses and other concrete, iron and steel buildings, as well as removing all kinds of waste after demolition and transporting it to the regular public dumps, leveling the land and handing it over to the owner of an empty land or excavating it upon request.

Group Branches

Environmental Services

We seek and are committed to keeping pace with the Kingdom's Vision 2030, which is built on three pillars: a vibrant society, a thriving economy, and an ambitious nation.

The Kingdom's vision "2030" sees the preservation of the environment and natural resources as a religious, social and moral duty, and accordingly, our company believes as we see it as our duty to provide environmental services that enhance this concept.

Our projects aim to raise the efficiency of waste management and reduce pollution, and our projects focus on recycling waste, protecting the environment and providing environmental logistical solutions in the areas of commercial and industrial waste transportation, and in our company we are committed to applying general standards using the best technologies and human cadres.

One of the main tasks of the company is city cleaning and waste disposal services. These services provide government projects to achieve the highest levels of environmental health, using modern methods such as equipment, machinery and consumables.

The highest levels of environmental health are also achieved by ensuring that there are no negative environmental impacts.

Waste recycling can be defined as a process in which industrial, agricultural and medical waste is recycled to organize an integrated waste management process among all parties involved according to their respective competencies.

These operations aim to reduce, sort, transport and recycle waste to achieve environmental sustainability, preserve public health, and reduce the negative impact and accumulation of this waste on the environment.

Commercial:

Transporting commercial waste and documenting the annual cleaning contracts with the municipality.

Structural:

Transportation of construction waste (demolition and construction).

Private and public contracts:

Transfer of commercial and construction waste on annual contracts to the public and private sectors.

GENERAL

A man in a dark suit stands with his back to the camera, holding a black suitcase. He is positioned in the center of a modern airport terminal, looking out through a large glass window. Outside, a commercial airplane is seen in flight against a bright, cloudy sky. The terminal interior features rows of grey airport-style seats on either side of the man. The overall lighting is bright and airy, suggesting a clear day.A white bus or shuttle vehicle is the central focus, parked at an airport terminal. The bus has a large windshield and side mirrors. In the background, a taxi is driving on a road, and the terminal building with its glass facade and roof structure is visible. The sky is blue with some clouds. The scene is captured from a low angle, emphasizing the scale of the vehicles and the terminal.
